DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-14 and 27, drawn to information processing apparatus comprising centralized switching, classified in claims 370, subclass 422.
 - II. Claims 15-26, drawn to information processing apparatus having a switching unit and a connection unit for connecting and communicating with an expansion device, classified in class 370, subclass 389.

The above inventions are separate, distinct and independent from each other because of the following reasons:

Because these inventions are distinct for the reasons given above and the search required for each group is not required for each other groups, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
